PROJECTS

Food Ordering Website

- Designed and developed a responsive and interactive food ordering website.
- Implemented dynamic menus, search functionality, top-rated restaurant filters, and a shopping cart system using JavaScript.
- Followed clean code practices to ensure maintainability and scalability.
- Technologies Used: HTML, CSS, JavaScript, React.js

Obys Agency Website Clone

 <https://obys-agency-two-dusky.vercel.app/>

- Created a pixel-perfect front-end clone of the Obys Agency website with smooth animations and interactive elements.
- Integrated GSAP and ScrollTrigger libraries to deliver rich user experiences through animations and scroll effects.
- Ensured cross-device compatibility and performance optimization for seamless rendering.
- Applied UI/UX and responsive design to match the original site.
- Technologies Used: HTML, CSS, JavaScript, GSAP, ScrollTrigger
